HUMAN BREATHING AND CREATING

FUTURES ARTIST / EDUCATOR

Erika Eva Kuittinen is a **futures artist, educator, and educational designer** working in the times between worlds. I am exploring future education, across sectors, through infinite play and relational learning in the time of AI. I believe we must learn new skills to meet the challenges of our times.

I have experience in **designing educational programmes** for high school, as well as **trainings** for organisations, business leaders and third sector. Methods I have created for these trainings stem from theatre, system sensing, mindfulness and relating practices.

My formal background is both as a physical theatre professional (MA **Theatre Directing**) and as a qualified teacher (MA in language education). I have years of experience as an improviser as well.

RECENT CLIENTS & PROJECTS
